Tile, brick, stone and concrete cleaner

Description

A powerful phosphoric acid-based cleaner for removing soap scum, mould and mildew, cement, latex resin contaminants from tiles, grout, concrete, brick, stone, slate and masonry surfaces.

Features

- Fast acting, deep cleaning
- Does not etch or damage surfaces
- Dilute with water for normal cleaning

Coverage (Approximate)

10-15m²/litre undiluted

Specification

The tile and grout cleaner shall be a phosphoric acid-based cleaner which does not etch or damage the surfaces such as **Kemclean** manufactured by **Construction Chemicals** and shall be applied in accordance with the manufacturer's application instructions.

Test Area

Before using the product, test to ensure that the surface is not affected during cleaning. Apply a few drops in an inconspicuous area. Leave for 15 minutes and rinse well. Dry and examine effect.

Tile and Grout Cleaning

Allow new grout to cure for more than 2 weeks. Saturate grout joints with water. Dilute **Kemclean** 50/50 with water and apply with a sponge or scrubbing brush. Allow to soak for 4-5 minutes and wash residue away with plenty of clean water.

Concrete, Brick, Slate, Stone or Masonry and Heavy Stains

Apply **Kemclean** directly to the surface and scrub with a brush or broom. Allow to soak for 5-10 minutes. Scrub again and wash residue away with plenty of clean water.

Caution

Keep out of reach of children. Avoid prolonged contact with skin. Apply in a well ventilated area. Wear gloves during application. Avoid prolonged exposure with porcelain surfaces.

Do not use on polished marble, bronze or metallic surfaces.
